mesh

mesh - Task / operator seating with mesh back

Conceived with comfort in mind, Mesh offers generous upholstery combined with sophisticated engineering to provide the ultimate in operator seating..... at a realistic price point.

A deluxe 'active' mesh back provides luxurious, yet responsive support, able to adapt to each user's back, offering high levels of seating comfort. A smooth, robust, synchronised seat and back movement, which may be set in a free-float mode to allow dynamic support, lies at the heart of this chair collection.

Seat depth adjustment is an option on all chairs while height adjustable arms complete this robust and versatile seating solution.

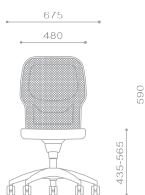

A synchronised mechanism is at the heart of the Mesh chair, providing the correct dynamic posture support required in today's hectic office environment.

Simple finger-tip adjustment ensures that the perfect posture can be achieved from the seated position, while the option of seat depth adjustment and height adjustable arms enable the Mesh chair to be 'tailored' to your exact requirement.

All chairs are manufactured under the stringent BS EN ISO 9001:2000 Quality Assurance Standards and BS EN ISO 14001:2004 Environmental Management System, ensuring a dependable quality that you can trust, together with a gentle environmental footprint.
