Task Collection

brought to you by Verco

Task Collection

A Passion for Ergonomic Excellence

Everything Verco does is driven by a passion to match innovation with excellence. Our Task Seating Collection has been developed by focusing on the best in design, technology and materials to reflect our seating philosophy. Our passion for ergonomic excellence inspired by movement and active support, underpins our Collection providing variety and comfort in every seated situation. The Task Seating Collection has been designed to comply with all relevant UK and European performance standards. Naturally.

We firmly believe in minimising waste to reduce the impact our furniture has on the environment. This concept is embraced at the design stage, where we use materials that will increase the longevity of our products throughout their life. Once our products come to the end of their life cycle they are of course able to be recycled.

In today's modern workplace, people are spending more time sitting down and over recent years there has also been a dramatic increase in the frequency and volume of back pain. Restricted physical movement, poor posture, stress, non-ergonomic furniture and an unhealthy lifestyle have all been cited as important factors contributing to back pain.

Wellbeing in the workplace is increasingly important for employers and has always been important for employees. Our Task Collection understands the importance of wellbeing and how the design of the workplace impacts performance, employee engagement and innovation.

Products that can facilitate a dynamic work-flow and adapt to a diverse work pattern can boost business performance, uncovering opportunities to supercharge any work environment.

Vibe_

Ergonomic seating from Roger Webb Associates

Vibe provides an ergonomically advanced, refined seating collection. Offering the discerning client the specification, flexibility and comfort they deserve, but with a gentle environmental footprint and an elegant style. Available with a full plastic back shell, fully upholstered or with a show wood outer back, Vibe can be tailored to suit most environments. With a choice of two back heights and a generously proportioned seat with carefully tailored upholstery, Vibe is simple in form and light in design providing an elegant seating solution for the modern office.

Refined ergonomic seating_Vibe

With a number of options available within the Vibe Collection, you'll be able to style your chairs for countless applications. From the conference room to the corner office to the reception area, Vibe thrives in any environment.

The Vibe family is formed through precision engineering which delivers a chair of proven longevity, with 94% of its parts recyclable. The Vibe family can cater for everything from call centres to executive offices, depending on the product specification.

Vibe Lite_

Ergonomic seating designed by Roger Webb Associates

Vibe Lite is a task chair family with design clarity at his heart. Research based ergonomics has informed the full range of adjustments which can be made to enhance personalised comfort and design. Durability at a sensible price.

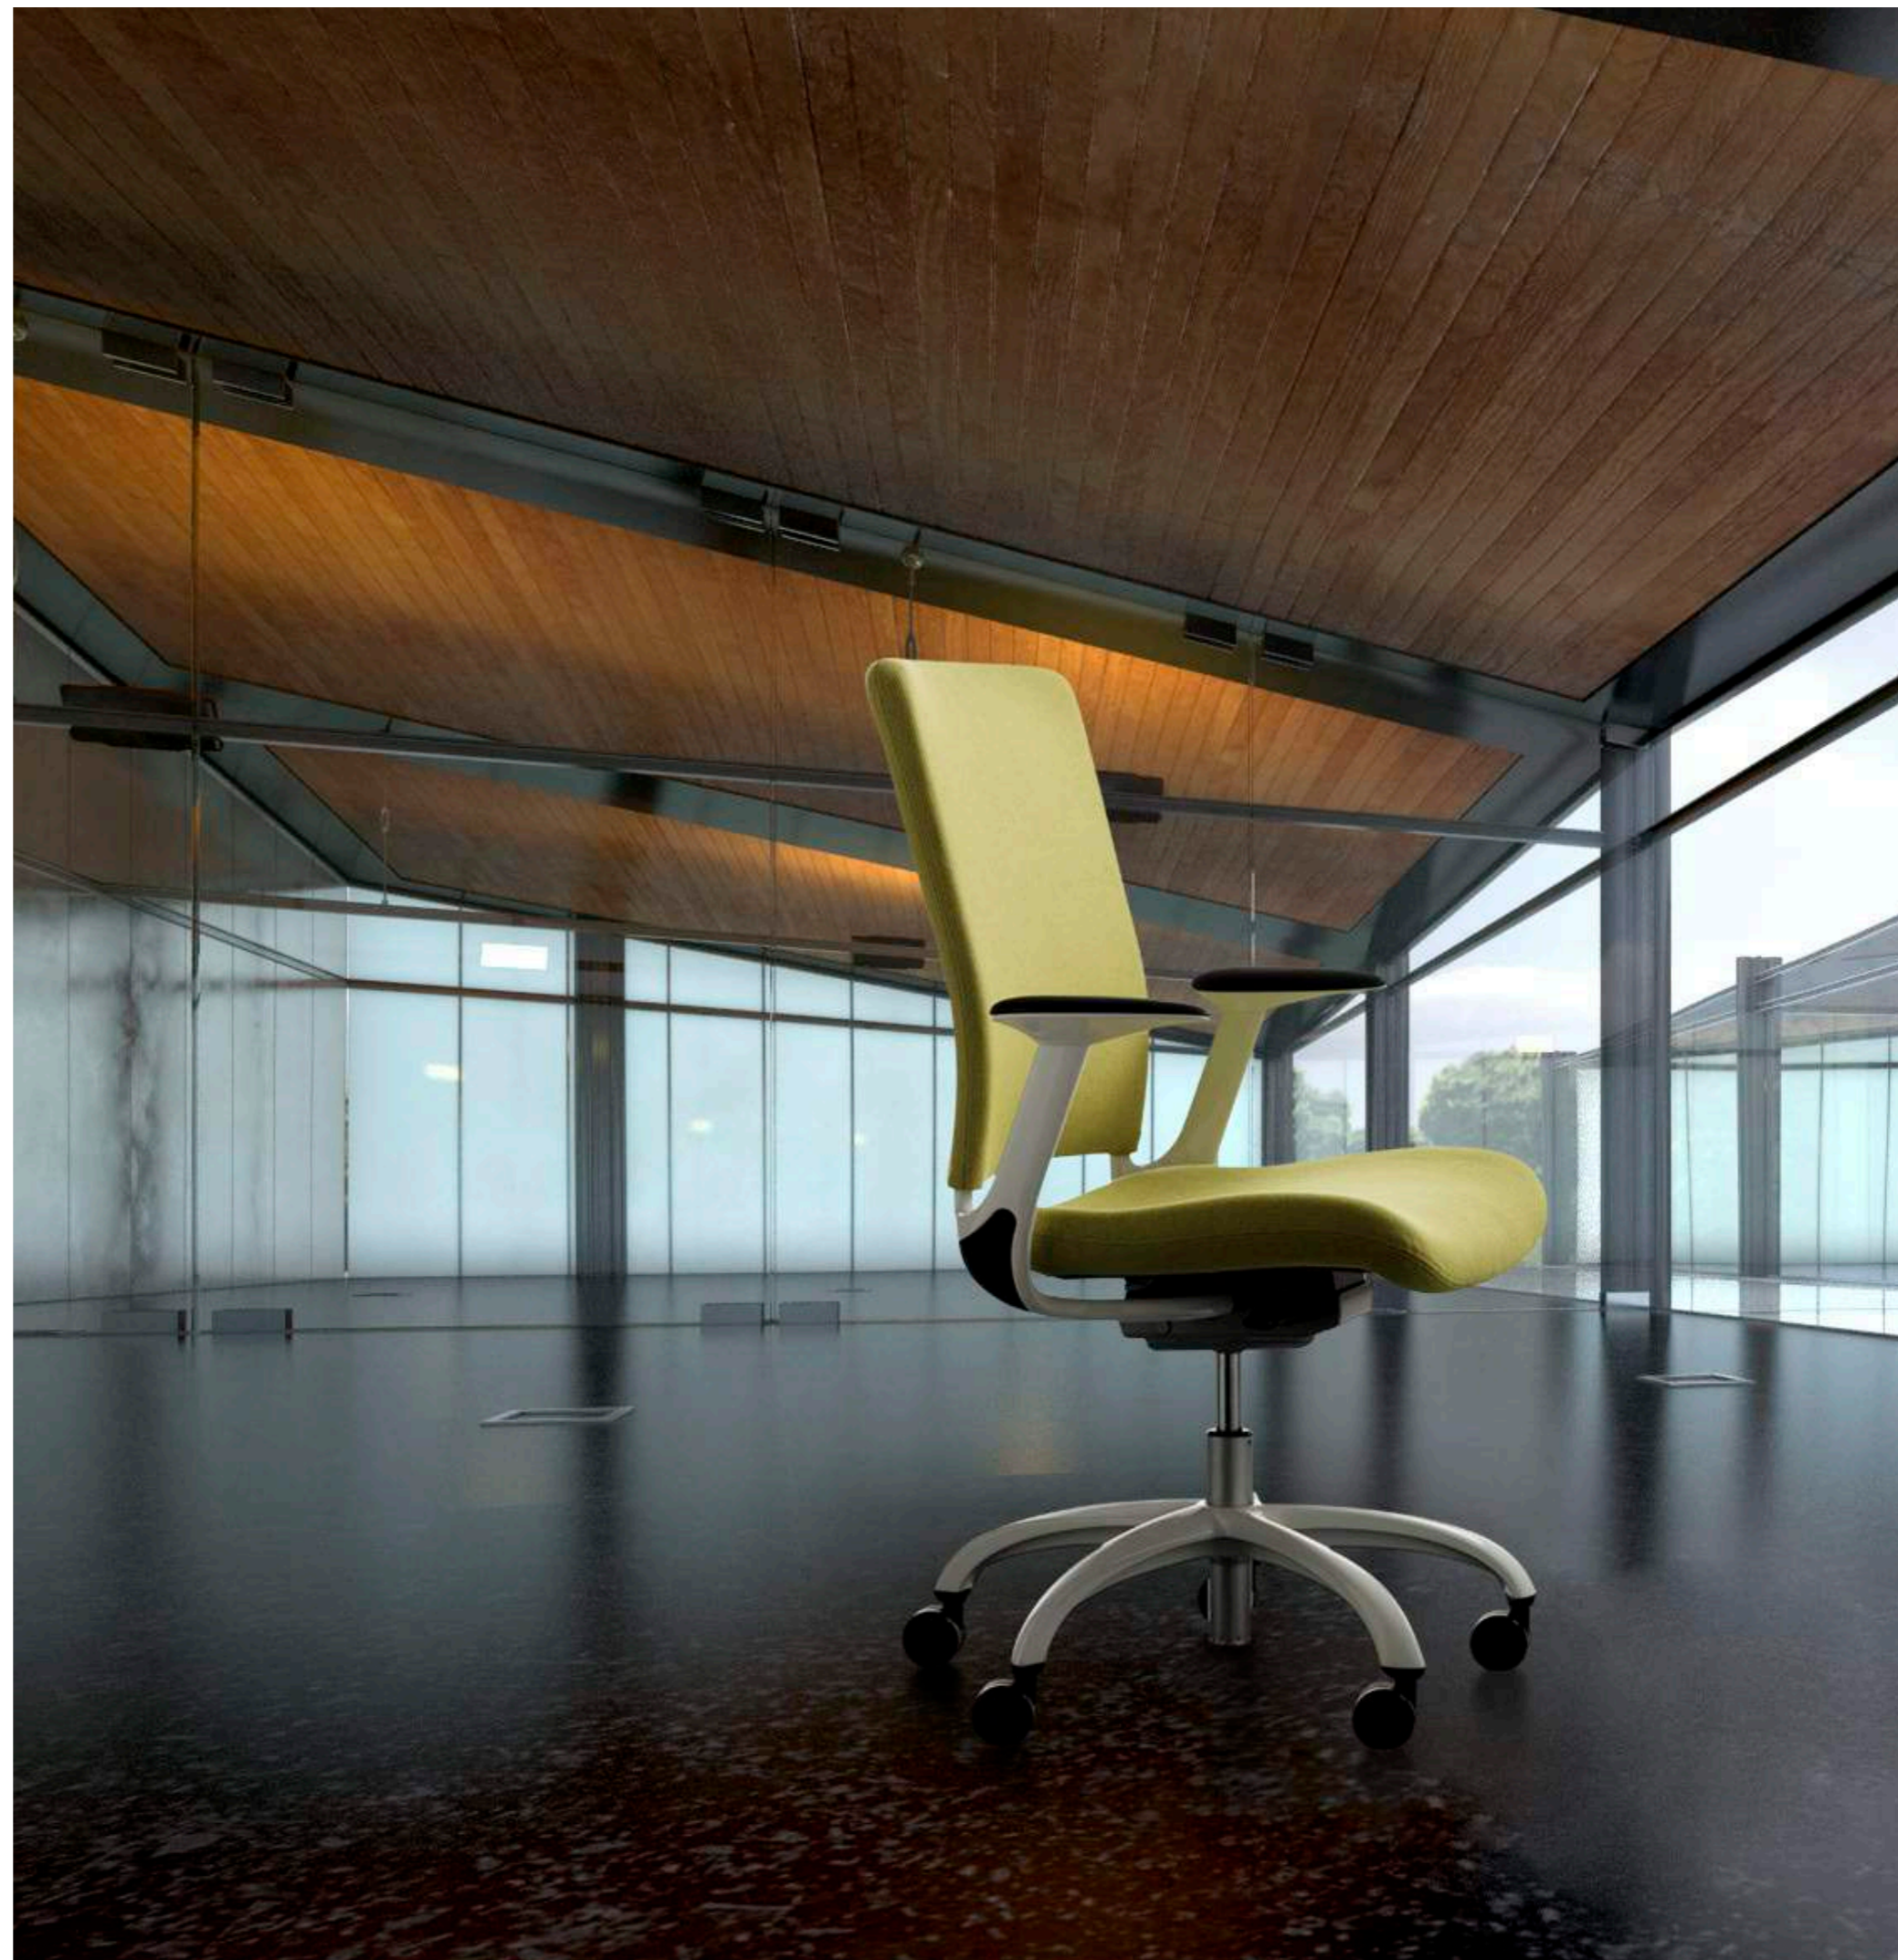

vSmart_

Ergonomic seating designed by Verco

vSmart has been developed by focusing the best in design, technology and materials to produce a radical new concept in seating. The patented smart mechanism inspires movement while at the same time providing active support and comfort in every seated position. vSmart responds and interacts with the person sitting in it, and it does that automatically, without the need to manually adjust a number of knobs and levers.

vSmart conforms to all relevant UK and European performance standards, and actively fosters and encourages a dynamic posture and is therefore ideal for collaborative and multi-user workspaces.

Intelligent & responsive_vSmart

vSmart automatically senses the weight of each user as they sit on the chair and instinctively provides the correct tension to work in harmony with each individual. It then establishes the height and depth of lumbar support required and ensures the flexible back fits naturally into the curve of the spine.

evSmart_

Smart Ergonomic seating designed by Verco

Ev-smart has emerged from our passion for innovation and excellence, to provide a radical new concept in seating that combines the best in design, technology and materials. Based on the popular V-smart 'intelligent' chair, Ev-smart is the natural progression - same concept, same comfort, but now combined with the popular ergonomic Ergoform back. With the same groundbreaking mechanism that allows movement whilst providing support and comfort every step of the way, Ev-smart automatically senses the user's weight and instinctively provides the correct tension to work in harmony with your body.

Breathe_

Ergonomic seating designed by Verco

Breathe is engineered for comfort with generous upholstery combined with an elegantly ergonomic form. An active mesh back provides responsive support, able to adapt to each user's back, offering high levels of seating comfort.

Simple finger-tip adjustment ensures the perfect posture can be achieved from the seated position. The point synchronised seat and back movement can be set in a free-float mode to allow dynamic support. Seat depth adjustment is standard on all chairs, as is a 'positive' forward tilting seat providing superior ergonomic posture control, while height adjustable arms complete this robust, versatile and elegant seating solution.

Fresh ergonomics _Breathe

Comfort & shape _Ergoform

By working closely with ergonomists, Verco have designed the Ergoform chair to control pelvic rotation, automatically. This encourages the spine to adopt its natural 'S' shaped curvature, gently supporting the pelvic girdle and reducing the tendency of the pelvis to rotate when the user sits down. This combination of pelvic and spinal support characteristics generates a supremely comfortable chair, which provides superior back support and the possibility of a reduction in the incidence of back pain.

Ergoform's ergonomic qualities have been formally recognised and the range was certified to the European ergonomic standard BS ISO 9241: part 5:1999 and awarded the FIRA ergonomic excellence award. Ergoform operator chairs are certified to BS 5459: part 2: 2000: test level 'S'.

Ergoform_

Ergonomic seating designed by Verco

Flow

Ergonomic seating designed by Verco

A task chair family with a wonderful clarity of design and simplicity of line. Clean lines and simple aesthetics mean that the Flow chair fits comfortably in most environments. Flow has a consistent design style; from the elegance of the new back frame to the specially designed and developed synchronised tilt mechanism, combining the back, armrest and seat in one continuous sweeping entity.

Function & style _Flow

A breathable and elastic mesh wraps the user comfortably when sitting in Flow, and provides superb support over a large contact area for long term user comfort. The option of visitor chairs, conference chairs and two heights of task chairs, mean that there is a chair to fit your own space and your own requirements.

Profile_

Ergonomic seating designed by Verco

The ergonomically designed back of the Profile task chair fits naturally into the curve of your spine and is the foundation stone upon which the Profile chair was created, while two heights of operator chair back ensure the versatility that is required for the seating demands from call centres to executive offices.

Elegance in ergonomics

_Profile

The elegant back has been combined with a contoured posture seat cushion to provide a strong aesthetic and this is then fused with a choice of four mechanisms and three base finishes to provide a seating solution for a wide range of environments - not just offices and conference areas, but collaborative and community spaces too.

Profile lite

Ergonomic seating designed by Verco

Effortless & assured _Profile Lite

The Profile Lite chair displays many of the technical attributes of more sophisticated products in the family at surprisingly affordable price point. Its ergonomic form and proportions are the result of our endeavour to provide quality products. The result allows for a variety of body shapes and sizes, providing a level of comfort and performance.

Profile 24_

Ergonomic seating designed by Verco

The Profile 24 is the ideal work chair for the modern office that dictates comfort, durability and style. The elegant back has been combined with a contoured posture seat cushion to provide a strong aesthetic. The robust mechanism and three base finishes provide a seating solution suitable for a wide range of environments - not just offices, but wherever long periods of use are required.

Mesh

Ergonomic seating designed by Verco

Generous ergonomics _Mesh

Conceived with comfort in mind, Mesh offers generous upholstery combined with sophisticated engineering at an attractive price point. The active mesh back provides luxurious, yet responsive support, able to adapt to each user's back, offering high levels of seating comfort. A smooth, yet robust synchronised seat and back movement, or a permanent contact back mechanism lie at the heart of this chair collection. Simple finger-tip adjustment ensures that the perfect posture can be

achieved from the seated position, the adjustable seat depth and arm height adjustment enables the Mesh chair to adjust to your perfect seating position. The sophisticated mesh back provides superior support and allows the free movement of air around the user's back, keeping you cool and comfortable in all conditions.

Salt 'n' Pepper_

Work seating designed by Verco

Salt and Pepper provides an insight into our advanced technological construction and simple to use features. The exceptionally comfortable form of the back and arm 'shell' provides tailored support for various body shapes and sizes, while its high end design look will spice up any office environment. With a choice of a classic black or stylish white frame, Salt and Pepper allow you to shake things up a little.

Pop_

Work seating designed by Verco

Pop is a range of robust task chairs with clean modern styling. The range includes the choice of medium or high backs and loop or adjustable height arm types. Both backs feature a slim-line profile and molded plastic back, with their contoured shape and height adjustability offering excellent support. The ergonomically shaped seat, can be specified with an adjustable depth seat slide, providing

increased comfort for different body shapes and applications. A synchronised mechanism provides excellent dynamic support, while independent seat and back rake adjustment can be provided by the ISB mechanism and a simple back rake angle adjustment mechanism provides a 'keen' entry price point to this popular seating collection.

Buzz_

Work seating designed by Verco

Buzz offers a new concept in operator seating, combining aesthetics, ergonomics and sensitivity. Underlined by its international style, its soft shapes and generous volumes, Buzz provides the requirements for all modern office environments. A large posture seat provides superior comfort, while the ergonomically profiled back provides the optimum support for continual use.

The gently shaped back is height adjustable, while there is a choice of three mechanisms: synchronised, independent seat and back plus back rake angle adjustment. An optional seat slide is available on all Buzz task models, as are a choice of loop arms or height adjustable arms with soft arm pads.

Cube_

Work seating designed by Verco

The Cube chair's linear design, combined with a compact footprint ensures that the Cube seating range is very space efficient, allowing the maximum volume of seating, with full multi-purpose functionality within any meeting or conference workspace.

The active back mechanism provides a sophisticated added comfort dimension to this elegant and versatile family of seating.

Carlo_

Work seating designed by Verco

The Carlo task chair utilises modern materials to create a chair that is both practical and innovative. Utilising a stylish, robust yet flexible nylon back the Carlo chair manages to deliver superb comfort characteristics, with a modern aesthetic and a comfortable price point. Available with a generously upholstered posture seat with a pronounced waterfall front edge, together with a tension controlled tilt function, Carlo also offers a choice of armrests and is provided with our standard full five year guarantee.

Look_

Work seating designed by Verco

Look provides anatomically designed seating at a competitive price point. Two contoured back sizes are available offering excellent postural support, while a generous posture seat with an enhanced 'waterfall' front ensures comfort over long periods of use. Simple fingertip controls offer smooth adjustment of the back angle and seat height, while curved armrests offer the user superb additional style and comfort. Choose between back rake and a forward tilt action mechanisms, medium and high backs, no arms, loop arms or adjustable arms. There is even a draftsman's model, so there is a solution to the most demanding of briefs and budgets.

LUXUS_

Executive seating designed by Verco

Luxus has been designed to provide unsurpassed comfort and style, being particularly suited where individuality and excellence are important. A tailored shell, designed to provide the correct ergonomic and back support, together with the addition of soft sculptured side padding, means the Luxus range of seating adds distinction and comfort to any office.

Luxury & comfort _ LUXUS

The Luxus collection has engineering and craft that delivers a chair of proven longevity, the swivel chairs feature a synchronised tilt mechanism with tension control and 'safety lock' facility, which may be locked in any position or left in 'free-float' for dynamic posture support.

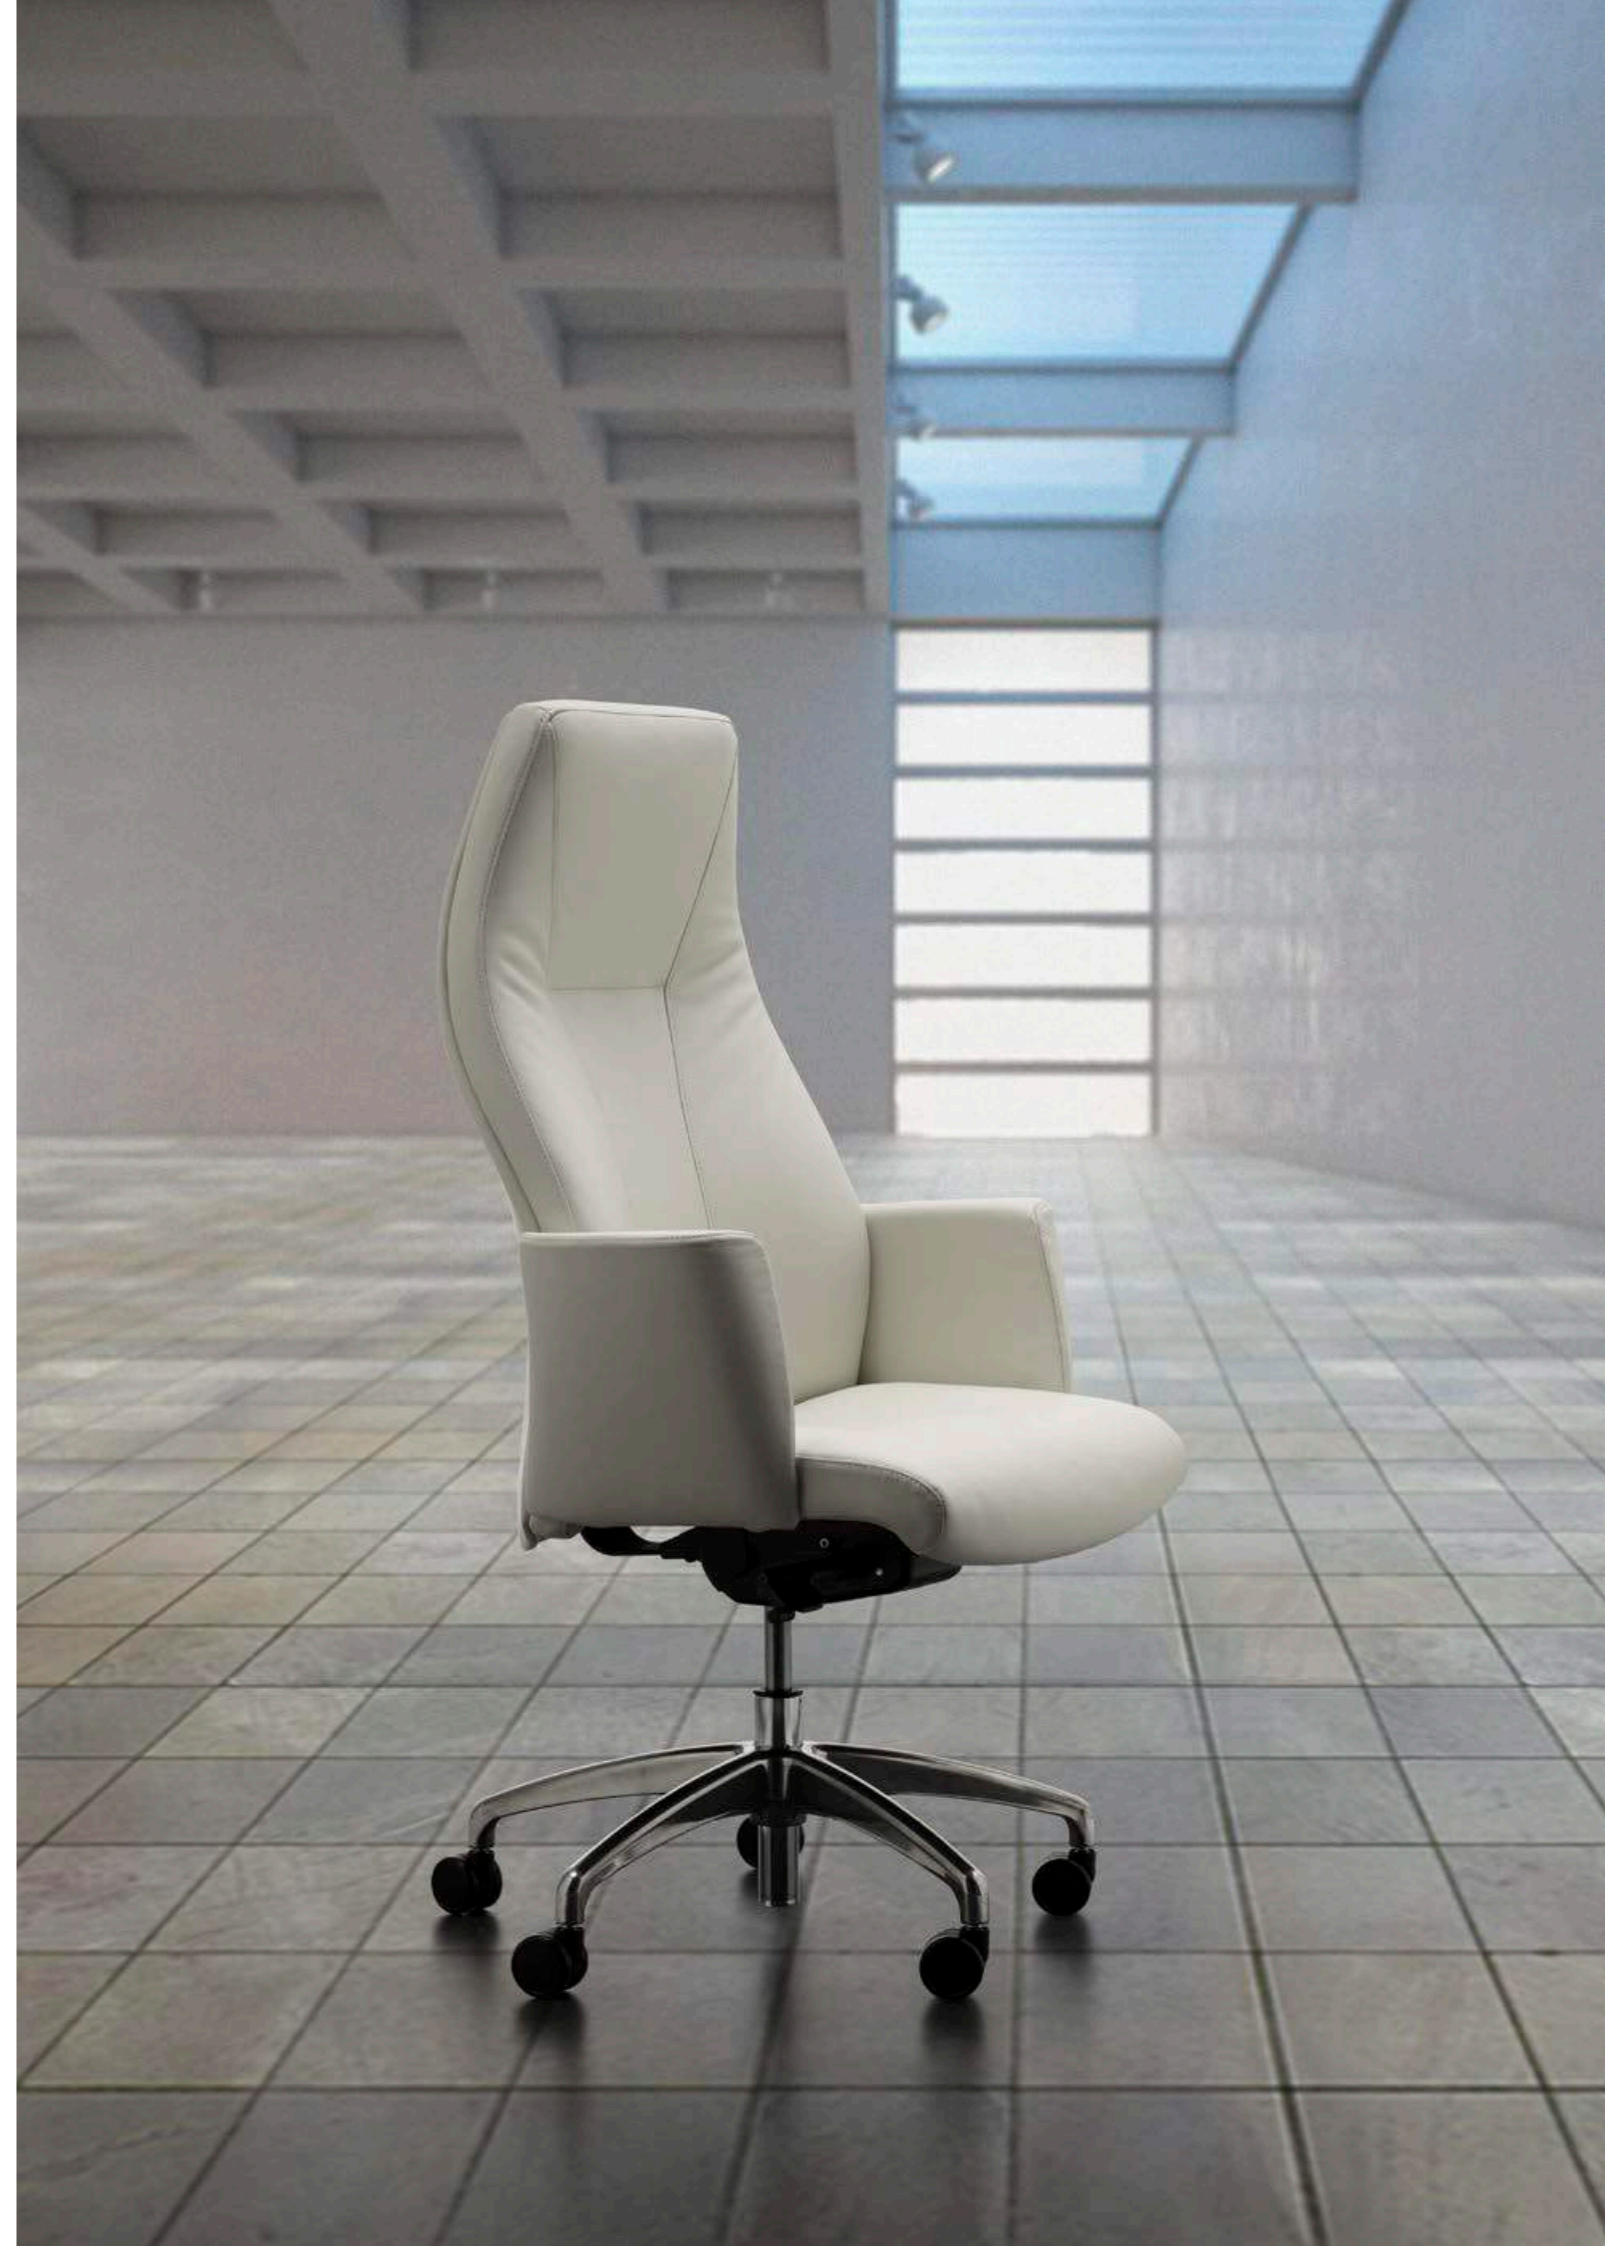

Verve²_

Executive seating designed by Verco

Verve² exudes style, quality and character, making a striking addition to any executive office or meeting room. Engineered with generous proportions to integrate the functions required for optimal comfort.

Its classically curved lines evoke a feeling of quality and substance. The contoured, back and curvaceous arms of the Verve² embrace your body, providing excellent ergonomic support.

Executive form_Verve²

The range comprises four visitor chair, with the distinctive arms and without and all supported by a chrome cantilever frame. There are three managerial chair options which utilise a sophisticated synchronised mechanism with side operated tension control, offering seat and back adjustability for complete comfort.

Ocean_

Executive seating designed by Verco

A superb, sophisticated and appealing range of managerial task seating that caters for the needs of the most discerning user. Individually moulded seat and back cushions combine with a fully synchronised seat and back tilt mechanism and aluminium finish detailing to enhance any environment, whether in an Executive Suite or Conference Room.

Calm comfort _Ocean

The choice of wooden armrests, which can be stained to match furniture and fittings, ensure that Ocean blends harmoniously with any design, while complimentary visitor's chairs complete the family.

Select 24_

Work seating designed by Verco

Select 24 provides an ergonomically advanced, pleasingly refined seating collection. Offering the discerning client the specification, flexibility and comfort they deserve. With a choice of two back heights and a generously proportioned seat with carefully tailored upholstery, Select 24 provides an elegant seating solution for the modern office.

Ergonomic comfort_Select 24

Select 24 is a chair with ample adjustment features for organisations seeking to get maximum functionality and comfort at an attractive price. The Select family has options which can be used for both a specialist occupational health chair and office task chair with supported features such as lumbar support, independent back angle recline and ergonomic low profile base.

Workchair_

Work seating designed by Verco

Workchair is a range of Polyurethane technical seating, comprising of stools, chairs and draftsman's chairs. All models are supplied with a black nylon bases as standard. Polished aluminium base is available as an upgrade. With the choice of back heights, footrings, seat types and anti-static castors, Workchair is the perfect solution for many commercial and industrial environments. High and intermediate chairs are supplied on glides while low chairs are fitted with safety castors as standard.

Vercos Policies

Quality

Vercos manufacture in High Wycombe, Buckinghamshire, a traditional home of furniture manufacturing in the South East of England. With over 50,000 square metres of production space and by using high quality components, the latest technology in manufacturing processes, allied to the skills and craftsmanship of our dedicated workforce, we have established ourselves as a major manufacturer of both seating and furniture solutions.

We design and manufacture aesthetically pleasing, high quality, inspirational seating and furniture solutions for the modern workspace; wherever that may be. Our current portfolio represents the culmination of over 100 years of experience within the furniture market.

VERCO Office Furniture manufacture under the stringent ISO BS EN 9001:2008 Quality Assurance standard. Products are continually tested to ensure they conform to the strength and stability requirements of British and European performance standards, enabling us to have confidence to give every piece of furniture and seating a full five year guarantee.

Environmental Impact

We are committed to continually improving the environmental impact of our activities, products and services and to continually improving our environmental performance. Indeed improving our environmental performance is a belief that we have held since our inception in 1912. We've worked to introduce environmental improvements throughout our manufacturing process and wherever possible reduce the environmental impact of all our operations, enabling us to secure accreditation to the Environmental Management System BS EN ISO 14001:2004.

We recognise that time taken at the design stage of any new product can have an immediate and fundamental effect on that product's environmental impact. From the careful selection of materials to maximise the recycled content and to minimise both the energy and CO2 footprints, to the end of life recyclability of the component parts, particular consideration has been given to the environmental impact at every stage.

Vercos continues to minimise any impact on the environment through our 'reducing, reusing and recycling' code.

Accreditations

All products are manufactured under the stringent BS EN ISO 9001:2008 quality assurance standard and the environmental management system BS EN ISO 14001:2004
