

VERCO Office Furniture Limited is committed to:

- ✓ Complying with all relevant legislation and regulations that affect our activities.
- ✓ Continually improving the environmental impact of our activities, products and services and to continually improving our environmental performance. BS EN 14001: 2004 specifies the requirements for an environmental management system (ems), which provides the framework for Verco to control any impact.
- ✓ Reducing the Company's use of energy and other resources, by increasing efficiency and by reducing all forms of waste, air and water pollution from its site.
- ✓ Conducting environmental audits at regular intervals according to their associated risk.
- ✓ Providing training and information to all our employees to ensure they fully integrate this policy into their responsibilities at work.
- ✓ Making this policy available on request.

As one of the UK's leading office furniture manufacturers we are committed to protecting the environment. We believe the time taken at the design stage of any new product can have an immediate and fundamental effect on that product's environmental impact.

From the careful selection of materials to maximise the recycled content and to minimise both the energy and CO2 footprints, to the 'end of life' recyclability of the component parts, particular consideration has been given to the environmental impact at every stage, from the design concept through to final production.

The mark of
responsible forestry

FSC® Forest Stewardship Council®

The Forest Stewardship Council (FSC) purpose is to promote environmentally appropriate, socially beneficial, and economically viable management of the world's forests to meet the needs of the present generation, without compromising those of future generations. It does this by developing standards, certification and a trademark recognition. The process of tracking a product back to the source forest is called 'Chain of custody' (C.O.C.) Certification.

Through C.O.C., a Company can demonstrate their commitment to the environment and responsible forest management. Over 99% of the Melamine faced chipboard used in our industry has been sourced from FSC certified suppliers.
