

# Jensen-up Assembly Instructions

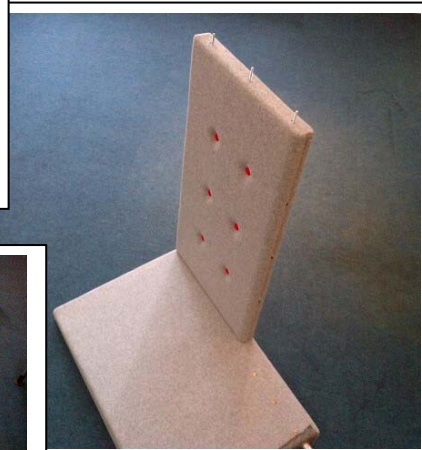

Unwrap and lay the 4 sections on a clean floor surface or protected by the wrapping

Fixings;  
6 x studs  
12 x set-screws

Screw in 3 studs to both sides of the upper back section – approx half in for the outer studs and one third in for the centre stud.

Stand the upper back onto the left side panel, locating the push-fit studs.

Stand the seat base onto the side and unzip the liner to access fitting.

Fix to the side using the 6 x set-screws each side, locating the corner fixing first, followed by the others in-turn.

... assembly Instructions (continued)

Drive home all set-screws, gradually, to ensure an even pull-up.

Lift and place the right side panel, locating carefully onto the upper back studs. This is a push/grip fit. ... push firmly home, **taking care not to trap fingers.**

Pull the side panel and base together and locate the corner fixing ... locate and tighten all 6 fixings, as above.

Zip-up the liner, then lift and rotate Jensen-up onto the feet ... taking care not to damage the legs or frame.

Alternative base frame
