enclave_

enclave_

A perimeter to define space.

enclave screens are sculptural in form and architectural in execution, both articulating and creating space. Enclave creates intimacy in open areas with sound absorbing panels to support focus, concentration and collaboration. Available in a choice of three heights of screen, with increasing sound absorption and reflection performance, enclave is able to achieve your desired level of privacy, simply, quickly and efficiently.

enclave_

A sanctuary of calm in an otherwise complex environment.

enclave screens create space to retreat and for focus work, or for time alone and provide a helpful balance to busy open-plan spaces. By including both existing or new furniture, soft and task seating, enclave supplies the versatility and flexibility, which is now required from furniture in today's post-covid environment.

enclave_

The creation of different neighbourhoods within the office community.

Enclave enables a balance to be struck in shared spaces within the communal office. Creating a vibrant 'village' of different, interesting and thoughtful spaces for different work scenarios.
