Helping to make meeting spaces work better.

The beautifully elegant Tablo range incorporates a simple, highly functional cable management system that encourages the use of technology, by providing an easy solution to the power and charging requirements of mobile devices. Each table base is equipped to provide simple and quick cable management from the floor to the underside of the table. The use of cable access ports, or flush-fitting power modules within the tabletops can provide the straightforward, easy-to-use solution that is now such a requirement of meeting places.

Tablo is available with a wide selection of top finishes allowing you to tailor the table to your budget, without losing the functionality, which is vital in today's meeting spaces, from standard and cost-effective MFC top finishes, through to laminates and real wood veneers, subtle design details shine through the entire portfolio and allow you to focus on what is important, whether that is a coffee with friends or the discussion with key clients.
