verco.

A workplace evolution.

At Verco, we don't just create intelligent office furniture; we craft spaces of concentration, application and productivity, places that inspire and motivate.

Where, when and how we work is constantly evolving. Today, workplaces need to be flexible to respond to diverse new expectations.

Design is our world.

Over 100 years of design and manufacturing experience have gone into creating our iconic portfolio of contemporary workplace furniture.

Run your fingers over the surface of any piece of furniture from Verco and you'll appreciate not only its undeniable design excellence but its meticulous craftsmanship and longevity.

Offering award-winning designs that combine ergonomic excellence with ethical production, our intelligent office furniture is not only functional but also mindful, placing workplace well-being firmly at its heart.

Through good design we
can make a positive impact
in every workplace.

verco

Sustainable solutions are at the heart of who we are.

Identify and comply.

We've established systems to identify all relevant environmental legislation so we can meet all resulting requirements.

Design decisions.

We specifically select materials that will reduce the environmental impact of our products throughout their life cycle.

Cut the waste.

We've minimised our use of energy by increasing efficiency and reducing all forms of waste, air and water pollution.

Continually vigilant.

We conduct environmental audits at regular intervals and provide training for all our employees.

Volatile organic compounds.

We are working with our suppliers to reduce their use of VOCs and their impact on the environment.

For us, sustainability is a fundamental requirement rather than a choice.

As one of the UK's leading office furniture manufacturers we are committed to protecting the environment. From the careful selection of materials to maximise their recycled content and to minimise their energy and CO2 footprints, to the 'end of life' recyclability of the component parts, we pride ourselves on our ethical consideration of their environmental impact at every stage of their development.

We also encourage the use of modular and reconfigurable furniture that can be reused and reassembled on demand, aligning with the broader goal of creating environmentally conscious and responsible workspaces.

The mark of responsible forestry

dna.

The quality of a working environment
helps dictate the quality of the work
that's done within it.

The aesthetic sense we're all born with
gives beauty and elegance the power to
inspire us to invent, create and achieve.
And where ergonomics complement style,
then you have an environment that plays a
vital role in business performance.

An elegant leg frame supports a variety of
worktop shapes and sizes, affording clarity
of thought and design in an otherwise
complex environment.

It's tough and long-lasting too, and when
it does reach the end of its life, more than
97% of its materials can be recycled for
an exceptionally gentle environmental
footprint.

**Designed in association
with Roger Webb.**

martin.

Martin was born from the current thinking around the modern, connected workplace and was designed to be a responsive, comprehensive family of work tables.

The way we work is drastically changing. Gone are the days of sitting at a desk for 8 hours a day – the modern workplace is embracing an 'agile' approach to work. A culture of a shared workspace has evolved with a thirst for communication and collaboration.

Martin's less formal, more friendly meeting tables encourage the best possible work across a variety of tasks, while the larger tables lend themselves naturally to boardroom environments.

Designed by Studio Verco.

meeting tables

martin.

Martin— a workplace evolution.

People expect flexibility around when,
where and how they work.

From the colour of the walls to the design
of the furniture, we believe that beautiful
spaces to work, thrive and innovate in
today, will help grow the businesses of
tomorrow.

meeting tables

martin.

WORK BEAUTIFULLY

Whether you want to have a quick chat with a colleague, a working session with the whole team or just need somewhere to work on a project of your own, it's vital that your space can adapt to your needs.

With its beautiful profile, its high quality materials, Martin can also provide poseur height tables as a place for more spontaneous and informal meetings.

meeting tables

martin.

A photograph of a modern meeting room. In the foreground, a long, rectangular table with a white top and light wood base is set with several white chairs that have red seats. The background features a living wall with various green plants and a dark brick wall. A close-up inset shows the table's edge, highlighting its sleek design and integrated cable management.

The modern and streamlined Aerofoil table base, with integral cable management and levelling feet, makes an interesting alternative for larger boardroom tables.

Sleek lines, luxurious materials, exquisite detailing. The aerofoil collection has been reimagined with new edge profiling in solid wood, bringing a touch of sophistication as well as improved durability over time, making it a fully sustainable option.

Verco have allied the traditional skills gained during more than a century of furniture design and manufacture to create Aston – a powerful furniture statement, with all the elegance of a classic car and the gravitas and attention to detail you would expect from one of the UK's leading manufacturers.

Aston can be specified with a single wood veneer finish, either oak or natural walnut and including a solid wood edge profile of the same finish, or in ice white or black, through-colour laminate with a solid wood edge profile.

partner.

Partner tables provide an interesting and useful variety of meeting solutions in a single piece of furniture.

They are available both with solid wooden legs, (Martin) and with robust tubular steel legs (Campus). All tables feature a circular high table with a diameter equal to the depth of the oval table to which it is joined.

The 'Martin Partner' tables feature solid wood lipping on both tables, with a square edge profile and is available in laminate top, Nano laminate or veneer finish only. While all standard MFC finishes are available, with a square edge profile on the 'Campus Partner' range with the option of robust laminated tops or veneered tops are available with a reverse chamfered and polished edge profile.

Continuing the style and feel of the popular Danny seating range, the Danny coffee tables share the same four leg chrome or black frame and are available either as circular or double barrelled in veneer, laminate or MFC finish.

These tables, although designed to compliment the Danny seating range, sit at ease with many other soft seating ranges and provide a sophisticated solution at a keen price point.
